File No. 32/ 4 / 2010-CD (CEN)

New Delhi, dated the 3rd April, 2012

To
The Director/ In-charge
DCO _____

Subject: Correction in tiff file name of NPR images for use in SECC- reg.

Madam/ Sir,

Of late, the nodal CPSUs in charge of conducting the SECC field-work have reported some cases of mismatch between the location codes recorded in the image file names of NPR schedule and the location codes written in the Abridged Houselist (AHL)/ EB-master loaded in the NIC website. This is creating a hindrance in execution of the cataloging/ indexing operation of the SECC and data uploading, as the location codes written in the image-file name is used at Charge data centres and the CPSU is not permitted to modify the location codes, except that of the Sub-Block. It has been decided that the following course of action may be taken in such cases:

- a) The CPSU should report the location codes where there are mismatches between the image file name of the NPR tiff file given for indexing and the EB master to the concerned DCO,
- b) The concerned DCO should examine the same using the Charge Registers of Census, finalized PT-1 and the scan database of the Census.
- c) The DCO should rectify the image file name in both the colour and the black & white tiff image files accordingly,
- d) The final correct complete location code should then be intimated to the CPSU by the DCO with a copy to the ORGI hqrs. and the DPD hqrs. in the form an appropriate For-Read statement,
- e) The DCO may also provide a copy of the corrected image file to the CPSU. Alternatively, the relevant For-Read statement should be used by the CPSU for making corrections in the tiff file names.

This issues with the approval of the Registrar General & Census Commissioner, India.

Yours faithfully,

(P. K. Banerjee)

Deputy Registrar General
