No.35301/01/2008-DPD

dated 17<sup>th</sup> December 2014

EDP Circular-15

**Subject: Launching of EFLOW Phase-III for CAC of NCO/NIC & Migration.**

As you are aware that most of the Data Centers have successfully completed Phase-II CAC work of Relationship, Education and Language. The remaining Centers are also expected to complete the work by the end of December 2014. It is, therefore, an appropriate time to launch the eFlow application software as Phase-III CAC for Coding of NCO/NIC & Migration returns.

2. eFLOW Phase-III consists of two applications (i) CAC FLOW-3 For CAC of NCO and NIC, which deals with Computer Assisted Coding (CAC) of the descriptive items as recorded under National Classification of Occupation and National Industrial Classification in Household schedule (Question No 17 & 18) and (ii) CAC FLOW-4 for CAC of Migration i.e. Question Number (23 & 24) which deals with the Place of birth and Place of last residence.

3. CAC of NCO and NIC is based on the sample using well deliberated statistical methods and it is already incorporated by the Data Processing Division in a Database for respective Data Centers. Software is designed in such a way that you have to input the batches as being done in earlier phase of CAC. However eflow software for CAC will ensure that only sampled images are displayed for coding. Coding of migration is on 100% data and being dealt with in separate eflow application. Details of both the eflow applications are attached with this circular.

4. Since coding of NCO and NIC need experience as well as knowledge of Industrial environment pertaining to the particular area under coding, it is necessary to form a team of experienced and new officials of Census as well Data Center to sort-out the issues during coding. All controlling officers are requested to form teams as suggested above and intimate the same to ORGI. It is also suggested that a ready slip note for District/State specific Industries may be prepared and circulated among the coding

staff to expedite the coding process.

5. As you are aware, it is the responsibility of the Controlling officers that do not have a data centre to coordinate with the Controlling Officers of the designated data center before CAC work is taken up. This will help to place the team of census officials in the Data Center in time to assist and view the progress of the workload.

6. In order to have exposure to the work-flow of CAC FLOW-3 and CAC FLOW-4 and also to get an initial feedback, a training workshop is scheduled at ORGI HQ on 18-12-2014 and subsequently need based training program will be held at each Data Centre or regionally. Moreover, Census and DP Division will keep on interacting with you regarding coding of NIC/NCO and Migration. However, in order to have a better understanding of the application software installation and detail operational coding processes, please go through the following attachments containing the salient features of EFLOW Phase-III application.

- a. CAC Migration Application Software Installation and Operations
- b. MIS – Reports for Effective Monitoring of Progress of Migration CAC
- c. CAC NIC/NCO Application Software Installation and Operations
- d. MIS – Reports for Effective Monitoring of Progress of NIC/NCO CAC
- e. Training Module for NIC/NCO Prepared by Census & DPD

7. The Application can be downloaded from the ORGI Intranet. On installation of both the Applications, trial runs must be undertaken for about one week to train the staff on operations and thereafter actual production may be started in consultation with DPD. A compliance report as per the enclosed format should be sent to the D.P. Division by the end of December 2014.
