The village of Trimbak, 36 kms from Nashik, is famous for the Trimbakeshwar Temple and as the source of the Godavari River. Trimbakeshwar enshrines one of the 12 jyotirlingas dedicated to Shiva and this one is considered to be the main jyotirlinga. Legend has it that Guatam Rishi performed a rigorous ritual of prayer and penance or tapasya to Shiva on Brahmagiri Hill which rises above the present-day temple. Pleased with this devotion, Shiva is said to have blessed him and brought down to earth from heaven the sacred rivers of Ganga, Gautami and Godavari.

---------------
The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non-Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non-Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and ‘most important commodity’ manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of ‘notified slums’.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added
amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio-gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System (PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centres (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Ranjit Singh Deol, Director of Census Operations, Maharashtra. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl. RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

PREFACE

The emphasis on decentralised planning is progressively gaining momentum in India in view of the enactment of Panchayat Raj Institutions at grass-root level. This Handbook provides necessary information required for planning and decision making at the micro level in the context of decentralized planning at District and block level.

In fact, Census has voluminous database systematically organised, updated and structured so that it is of some value and generates valuable information for development. For the best utilisation of such extensive data, the Census Organisation is publishing such primary census data, integrated with other non-census data from secondary sources with village level information and maps as a handbook for each District. The Registrar General and Census Commissioner in his foreword has already provided sufficient details of history and scope of the publication of District Census Handbook.

The design for the 2011 District Census Handbook was evolved centrally by the Census Commissioner, India. In accomplishing this task we have received whole-hearted co-operation of the staff at various levels of different departments of the Government of Maharashtra. Much of the data so provided by this field level officers have been cross checked with the data obtained from various departments and an attempt has been made to reconcile the discrepancies as well through the software provided by the Registrar General and Census Commissioner, India.

I am deeply grateful to Dr.C.Chandramouli, Registrar General & Census Commissioner, India and Shri Deepak Rastogi, Additional Registrar General for their guidance in bringing out this publication. I also express my thanks to Shri A.P.Singh, Deputy Registrar General (Map), Shri A.K.Singh, Deputy Registrar General (Census Division), Dr.Pratibha Kumari, Assistant Registrar General (SS Division), Shri M.S.Thapa, Addl. Director (EDP) and their colleagues for providing technical guidance in finalising this volume.

In this Directorate the DCHB section was spearheaded by Shri Y.S.Patil, Deputy Director under the guidance of Dr. S.S.Hiremath, Joint Director. He was ably assisted by Shri D. B.Gode, Assistant Director, Shri W.A.D'Souza, Statistical Investigator Gr.I and Smt. Winifred A. D'Souza, Statistical Investigator Gr. I.

The physical features have been concurred by the Map section, after incorporating necessary updates, wherever required. The maps inserted are prepared by the Cartography Section under the guidance of Shri D.N. Chaurasia, R.O(Map). I am thankful to the Census Section headed by Smt. B.H. Thakare, Assistant Director, PCA/DDU unit headed by Shri Santosh Payas, Assistant Director and DDE section headed by Shri Vijay Ahire, Deputy Director.

Lastly, I take this opportunity to offer my thanks to all officials in various grades who have been actively involved in voluminous work of compilation and preparation of this volume. The list of the officials of this Directorate closely associated with this work is given in the “Acknowledgements”.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub-micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to District level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each District. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the District. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the District, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, District census tables and certain analytical tables based on PCA and amenity data in respect of villages. Both the Parts have been published in separate volumes in 2011 Census.
Brief History of the District

It is believed that the name of Nashik District has its origin from the story of Ramayan. Lord Rama with his wife Sita and brother Laxmana stayed during their exile period at Panchavati (Nashik). Laxmana severed the nose (Nasika, a Sanskrit word) of Ravana’s sister Shurpanakha who insisted to marry Laxmana. Thus, the name ‘Nashik’ was originated. The earliest literary mention of Nashik occurs in a Vattika of Katyayana (circa 250 B.C.) on Panini’s Sutra (VI, I, 63) as explained by Patanjali. Katyayan’s Vattika implies the name Nasikya, a city (Nagara) which was the same as modern Nashik. Later, the name occurs in several subsequent works such as the Brihtsambita of Varahamihira (6th century A.D.), Vayu, Varaha and other Puranas. Nashik was however more famous as a holy pilgrimage centre than as the headquarters of the territorial division.

Nashik went through rules of different dynasties. The period of Yadava supremacy ended with the invasions of Muslims from the north under Ala-ud-din Khilji and Malik Kafur. For about twenty years after Ala-ud-din Khilji’s conquest (1294), most of the present day District of Nashik formed a part of the dominions of the territory of Sultan of Delhi (1317 A.D.) and then passed to the Bahamani King (1347-1490) of Gulbarga and lastly to Nizam Shahi King (1490-1630) of Ahmadnagar. Subsequently, Nashik was included in the Mughal province of Aurangabad.

During Maratha regime, Nashik District occupied a key position in Maharashtra. It was later liberated from Muslim rule by Marathas and came under British rule in 1818. The present territory of Nashik District was formerly distributed partly in Khandesh and Ahmadnagar Districts. In 1837-38 part of Ahmadnagar District consisting of Sinnar, Chandor, Dindori, Nashik including Igatpuri and Peint State were made into a sub-collectorate under Ahmadnagar. The sub-Collectorate of Nashik was, however, abolished in 1856 and its talukas incorporated in Ahmadnagar District. In 1861, Nimarpeta under Sinnar and Vani Peta under Dindori were abolished and a new sub-division was formed with headquarters at Niphad. Headquarters of Karnal taluka included in Trimbak peta was transferred to Igatpuri town in the year 1861-62 and the name of the taluka changed from Karnai to Igatpuri taluka. In 1869, Nashik was made a full-fledged District, with eight sub-divisions of Ahmadnagar viz. Nashik, Sinnar, Igatpuri, Dindori, Chandor, Niphad, Yevla and Akola and three sub-divisions namely Nandgaon, Malegaon and Baglan from Khandesh and Peint State. Shortly, afterwards Akola taluka was merged back to Ahmadnagar. In 1875, Baglan taluka was divided into two talukas viz. Baglan or Satana and Kalwan. After the death of Begam Peint, State became British territory and was made into sub division in 1878. There were no major changes in the District or taluka boundaries between 1901 and 1948.

Consequent upon the merger of Indian States, a new Mahal known as Surgana mahal consisting of the former Indian State of Surgana was created in 1949. In 1950, about 11 villages were transferred to Aurangabad District. Two villages from Surat District were added to Nashik District. Four villages were transferred to Dhule District. With the re-organisation of States in 1956, the District was included in Mumbai State and later since 1960 it formed a part of Maharashtra.
At the time of 1961 Census, the District comprised of 11 talukas and 2 mahals, having 1652 inhabited villages and 15 towns. At the time of 1971 Census, the District had 13 Tahsils comprising 1628 inhabited villages and 20 towns. The number of Tahsils in the District remained unchanged in 1981 Census. However, three new towns were added namely Satpur, Vadner and Eklahare and four towns Manmad (N.M.), Nandgaon (N.M.), Pimpalgaon Basvant and Vani were declassified. At the time of 1991 Census, the number of Tahsil remained 13 with 1814 inhabited villages. Two municipal councils namely, Nashik Road Deolali and Satpur; and one Census Town namely, Vadner have been merged along with 19 villages of Nashik Tahsil with the Nashik Municipal Corporation. Ghoti Bk. village of 1981 Census was declared as Census Town in 1991 Census. At the time of 2001 Census, the District had 15 Tahsils comprising 1929 villages and 18 towns. In 2011 Census, the District has 15 Tahsils, 25 towns and 1922 villages (including 3 uninhabited villages).
Physical features

Location and Size

Nashik District is situated partly in the Tapi basin and partly in the upper Godavari basin. It lies between 19°35’ and 20°52’ north latitudes and 73°16’ and 74°56’ east longitudes. It is surrounded by Dhule District in the north, Jalgaon and Aurangabad Districts in the east, Ahmadnagar District in the south, Thane District in the south-west and Gujarat State in the north-west.

As per Census, 2011 the District has an area of 15,530 sq.kms and its population is 61,07,187. While the area of the District accounts for 5.05 percent of the total area of the State, the District population constitutes 5.43 percent of the total State’s population. The density of population is 393 persons per sq. km. Among the 35 Districts of the State, the District ranks 3rd in terms of area, 4th in terms of population and 7th in terms of density.

The District derives its name from that of its headquarters, Nashik. It is situated on both sides of the sacred Godavari river and is well connected by rail, road and air.

Physiography

India has been divided into four macro level physical divisions. These are The Northern Mountains, The Great Plains, The Deccan Plateau and the Coastal Plains and Islands.

Maharashtra falls under two of these macro level divisions 1) The Deccan Plateau and 2) The Coastal Plains and Islands. The north-south running Sahyadri range separates these two divisions. The Deccan Plateau lies to the east while the Coastal Plains and Islands lie to the west up to the Arabian Sea. The Deccan Plateau is much larger of the two divisions and includes twenty nine Districts of the State while only six Districts lie in the Coastal Plains and Islands.

The whole Deccan Plateau is sub-divided into 12 meso regions. Of these, only 2 meso regions i.e. Northern Maharashtra and The Maharashtra Plateau lie within the State. Northern Maharashtra is further divided into 2 micro regions i.e. The Tapi-Purna Valley and The Wardha-Penganga-Wainganga Plain. The Maharashtra Plateau is also further sub-divided into 2 micro regions i.e. The Eastern Plateau and The Western Plateau with Protruded Hills.

The Coastal Plains and Islands are divided into 4 meso regions i.e. Gujarat Region, Western Coastal Region, Eastern Coastal Region and The Islands. Of these, The Western Coastal Region covers Maharashtra. This region is divided into 4 micro level regions i.e. Maharashtra Littoral, Goa Coast, Karnataka Coast and North Kerala Coast. Only Maharashtra Littoral falls within the State of Maharashtra.

The hierarchy of these macro, meso and micro level physiographical divisions within Maharashtra State are as below:

(A) Deccan Plateau:

(i) Northern Maharashtra:

(a) Tapi-Purna Valley: Includes the Districts of Nandurbar, Dhule, Jalgaon, Buldana, Akola, Washim and Amravati.

(b) Wardha-Penganga-Wainganga Plain: Includes the Districts of Wardha, Nagpur, Yavatmal, Bhandara, Gondiya, Gadchiroli and Chandrapur.
(ii) Maharashtra Plateau:

(b) Western Maharashtra with Protruded Hills: - Includes the Districts of Nashik, Ahmadnagar, Pune and Satara.

(B) Coastal Plains and Islands:

(i) Western Coastal Plains:

(a) Maharashtra Littoral: Includes the Districts of Thane, Mumbai (Suburban), Mumbai, Raigarh, Ratnagiri and Sindhudurg.

Nashik forms a part of the western plateau with protruded hills micro level division of the Deccan plateau and is situated in north-west Maharashtra. The physiography of the District may be grouped into 6 parts namely (i) Sahyadri Hills, (ii) Satmala Hills, (iii) Girna Basin (iv) Godavari Basin (v) Sinnar Upland and (vi) Yevla Plateau.

i) Running north-south in the western part of the District, the Sahyadri Hills cover the entire Tahsils of Peint, Surgana (except for a small part in the east) and parts of Kalwan, Nashik, Trimbakeshwar, Igatpuri, Dindori and Baglan. This region has an altitude varying between 900 to 1,200 metres. The central parts of these hills are more elevated than the northern and southern portions. The hills are densely covered under forests and these are mainly reserved forests.

This hill range is the source of many rivers flowing through the District. In fact, it serves as a water divide between the rivers and those flowing wests. The rivers Godavari, Darna, Kadya, Girna and Mosam are the main east flowing rivers. Par, Dhamanganga and Wai are the main west flowing rivers. As such the region is highly dissected. In fact, the region is series of valleys and interfluves resulting from dissection by streams running in deep beds.

ii) Satmala Hill Range is an offshoot of Sahyadries. It covers parts of Kalwan, Baglan and Deola Tahsils and small parts of Malegaon, Chandvad and Surgana Tahsils. It is water divide between the systems of Godawari and Girna within the District. The hills have an altitude varying between 800 to 1,100 metres and it is fairly covered with forests which are mainly reserved forests.

iii) Girna Basin is located in the north-eastern part of the District. The basin includes entire Tahsils of Malegaon and Nandgaon, part of Baglan and Deola Tahsil and small parts of Kalwan, Chandvad and Yevla Tahsils. It has an altitude varying between 400 and 700 metres. However, a few hillocks located within the basin have a much higher elevation. This region, in general, slopes towards east. The hillocks and the upper reaches of the basin have some forest cover. The western part is relatively more dissected than the central and eastern, as such the western part is comparatively more uneven. In general the topography of basin is rugged and soils are generally light.

iv) Godavari Basin includes parts of Dindori, Niphad, Chandvad, Nashik and Sinnar Tahsils. This basin, in general, has an altitude of between 500 and 900 metres. The northwestern part is more elevated and it slopes towards south-east. Except for small forest cover in the north-west, the region has practically no forest. The surface is undulating in nature but near the rivers soils are very fertile. It is a well-known area for grapes plantation and cultivation of onion and other vegetables.

v) Sinnar Upland is situated in the extreme southern part of the District. The upland spreads over parts of Igatpuri and Sinnar Tahsils. Broadly, this plateau has an elevation varying from 600 metres to 960 metres. The plateau is dissected by numerous streams and the surface is uneven.

vi) Yevla Plateau covers most of Yevla Tahsil and very small parts of Niphad, Chandvad and Nandgaon Tahsils. This plateau has an altitude of 500 and 600 metres. The plateau descends gently
towards south. Mainly small streams drain it. All these streams meet the main river Godavari flowing in the south.

Drainage

The drainage pattern and the trend line of the ridges depend on the structure of the underlying basaltic rocks of the District. These rocks inter bedded with ash layers, have developed three sets of master joints, running approximately in directions north-south (strike direction), northwest-southeast and north-north east, south-south west. The streams of the region have taken advantage of these planes of weakness in their carrying valleys as is shown by the following features; streams generally run in one or other of these three sets of directions; the bends at the confluences of almost every rill with its main streams are generally rectangular and the courses of most valleys are almost straight.

The District is drained by two chief rivers, the Girna and the Godavari and their tributaries, the watershed between them being the Satmala range. Apart from these there are innumerable small streams that flow down the western scarp of the Sahyadries draining westwards towards the Arabian Sea. The Girna rises just south of Cherai village about 8 kms, south-west of Hatgad in the Sahyadries. It flows almost due east along a wide bed, with high banks in some parts but generally low enough to permit the use of water for irrigation. Several dams have been built across the main stream, irrigating large areas of garden land. The Girna in its upper course receives several tributaries of nearly its own size and equally useful for irrigation. Some important tributaries of the Girna are Tamboli, Punand, Aram, Mosam, Panjan and Mainad.

The Godavari is the most celebrated river not only of the District but also of the whole peninsular India. The Godavari rises in the Sahyadri range near Trimbak and drains Trimbakeshwar, Nashik and Niphad Tahsils. After passing the town of Trimbak, the Godavari turns to the east cutting a deep and rocky bed. During its course many small stream meet the Godavari, the important amongst them are the Kadva, the Kashvapi, the Nasardi and the Darna.

There are 8 big, 6 medium and 51 small size tanks, 39 lakes and 2361 reservoirs in the District.

Climate

The climate of the District is generally dry except during the south-west monsoon season. The year may be divided into four seasons. The cold season from December to February is followed by the hot season from the March to May. The south-west monsoon season is from June to September followed by post monsoon season in October and November.

During 2009-10 Ditstrict has recorded an average of 762 mm rain. The rainfall, in general decreases as one proceeds from west to east. The extreme western part receives much more rain than the rest of the District. Western Tahsils of Ikatpuri, Trimbakeshwar, Surgana and Peint have an average rainfall of 2000 mm., while the average rainfall in the east of the District is only 635 mm. The rains start about the middle of the June and last till the end of September. The intensity of rainfall is greater in July and August. About 88 percent of the total annual rainfall is received during the south west monsoon season. During the pre and post monsoon months, some rainfall occurs in the form of thunder showers. The variation in the rainfall from year to year in the District is not large.

Temperature begins to increase rapidly from the latter half of February. May is the hottest month of the year with the mean daily maximum temperature about 41ºC. The heat is intense in the height of summer and on some days the maximum temperature may reach about 45ºC in the eastern parts of the District. With the onset of the monsoons day temperature decrease appreciably and the weather throughout the south-west monsoon season is pleasant. With the withdrawal of the monsoons, day temperatures increase but night temperature progressively decreases. From November, both day and
Night temperatures decrease rapidly. December is the coldest month with the mean daily minimum temperature about at 10°C at Nashik. The cold waves over northern India sometimes affect the District and the minimum temperature may drop to a little above freezing point.

The air is very humid during the south-west monsoon season but is generally dry during the rest of the year. Skies are mostly clear or lightly clouded and winds are generally light to moderate. During the south-west monsoon season the skies are heavily clouded to overcast and there is some strengthening of the wind. Some of the storms and depressions from the Arabian Sea, in the latter half of summer and in the post monsoon months, affect the District and give widespread rain.

Natural Economic Resources

Forestry

This includes all land classified as forest under any legal enactment dealing with forest or administered as forest, whether state owned or private and whether wooded or simply maintained as forest land. Within the forest area itself, there may be occasionally cultivated patches or grazing lands, but such area are shown under column 104 of the Village Directory as forest. The process of regularization of land grants and effecting relevant changes in the basic records of survey and settlement are somewhat protracted and time consuming. Therefore the information based on records is in some cases at least, likely to be different when compared with the actual field situation.

Minerals and mining

The District as a whole is monotonously covered by Deccan Trap basaltic lava flows, which are spread out in the form of horizontal sheets or beds. In some flows, the basalt is columnar and spreads into fantastic shapes. Trap rocks are generally barren of any economically useful and important minerals but being hard, dense and durable are most suitable for building purposes. Occurrence of iron ore is reported near Bhadra in Surgana Tahsil but it is not of any economic significance.

Lime nodules and kankar are found practically all over the District. The lime nodules yield a very good lime, slightly hydraulic but not sufficiently so to be used under water. Mixed with pounded bricks and sand it forms a fair mortar.

Soil and Cropping pattern

The soils of the District are essentially derived from the Deccan trap, which is the predominant rock formation of the District. The soil formation is mainly affected by the climatic conditions and topography of the District. In the western part of heavy rainfall, the soils have developed under humid conditions with some laterite soils being observed at higher altitudes of the hills. The soils in the Godavari, Kadva and upper reaches of the Girna and Mosam valleys are quite deep and fertile. Light shallow soils are found on hill slopes and very coarse soils at higher elevations.

The soils in the heavy rainfall zone are neutral in reaction, contain higher amounts of organic matter and are low in their base status. Rice is grown in the valleys and millets on the less precipitous hill slopes. On the higher slopes, nagli and vari are grown. The soils in the low rainfall area are alkaline and are low in their content of organic matter and nitrogen. Bajri is the main crop grown. In between lie the soils of the transitional zone of moderate rainfall. They are slightly alkaline in reaction and contain moderate amounts of organic matter. Rice, sugarcane, grapes, wheat, jowar and vegetables, especially onions are grown.

Agriculture

Most of the people of this District are engaged in agricultural activities as is evident from Census, 2011 that 35.01 percent of the total workers are classified as cultivators and 26.43 percent are
classified as agricultural labourers in the District. Together they constitute 61.44 percent of the total workers of the District.

**Irrigation**

The Concept of irrigation implies the existence of a source of water supply within a reasonable distance and an arrangement to regulate the supply of the water according to the day-to-day needs of the crops rose in these fields. Naturally therefore all areas, which are cultivated under purely rain fed conditions, are treated as unirrigated lands.

Columns 113 and 114 of the Village Directory give all the agricultural land and when added together would correspond to the net area sown. Area sown more than once during the same year, if any, in the village is counted only once under this column. Columns 115 to 119 give source wise breakup of the irrigated area. All lands that are lying uncultivated as fallow for more than 5 years in succession are recorded as permanent fallow (Culturable waste) and are covered under column 109.

**Animal Husbandry**

As per census of livestock of 2003, the information on important number of livestock and livestock indicators are given below:

1. Total Cross bred / Indigenous Cattle --- 9,68,867
2. Total Buffaloes --- 1,64,330
3. Total Sheep --- 324,934
4. Total Goats --- 6,99,975
5. Total Equine --- 7,011
6. Total Donkey --- N.A.
7. Other Livestock --- 2,401
8. Total Hens --- 32,13,582
9. Total Poultry --- 32,17,551

In the District there are 9,68,867 crossbred/indigenous cattle, 1,64,330 buffaloes, 3,24,934 sheep, 6,99,975 goats, 7,011 Equine. Total poultry is 32,17,551 including 32,13,582 hens.

**Fishery**

Fresh water fishing is carried out mainly in the rivers and water reservoirs. There are few fishermen who are scattered about in the District without forming concentrations of fishing villages. They mainly belong to the communities of Dhimars, Bhois, Kolis and Bhils. Fishing is done mainly by drag and gill nets. Besides these, fishermen use funnel-shaped Bamboo traps mostly during the rainy season at the corners of rice fields where water drains off. In the fair season, these traps are also used in the channels of small streams. Only small fish are caught in the traps. Fishing by rod and line is also practiced on a small scale. The bulk of the commercial catch from the rivers and streams comprises mainly Murrrels, Catfishes and minor varieties of Crabs.
The District has 687 kms of river belt. During 2009-2010 about 23,353 hectares of water-spread area was available. Out of it 23,246 hectares were used for fishing activities. In the year 2009-10, the fishery product from inland water was 3,900 Metric Tons and the income received was Rs.779.2 lakh. Further, 86 co-operative societies of fishermen have been registered in the District with about 7,066 members\(^1\).

**Industry**

Industrially, Maharashtra is one of the advanced States in the country. Nashik District is predominantly an agricultural District. Availability of infrastructures like rail, road transport, water and electricity have contributed in the development of various types of industries in the District. There are some large scale industries and a number of small scale industries running in this District. The employment in non-agricultural sector depends mainly upon the village and cottage industries.

The industrial policy of the State is based on the basic decision to encourage industries in the developing and underdeveloped areas in the District and to disperse industries from the highly congested areas of Mumbai, Thane and Pune. In the District, there are industrial estates at Nashik, Malegaon, Sinnar, Mannmad in Nandgaon Tahsil and Yevla Tahsil. MIDC has developed industrial estates at Satpur and Ambad. Small scales as well as large scale industries are running in these areas.

Among large scale industries, textile industry is the most important in Malegaon Tahsil. Sugar industry is another important industry at Ravalgaon, Dabhadi and Sukene Kasba. Hindustan aeronautics factory at Ozar, thermal power station at Eklahare, Government of India security press and the new currency note press at Nashik Road, Oil mills at Lasalgaon, Bhagur and Nandgaon are the large scale industries in the District. Lasalgaon, in particular, is famous as the main market for onions in the District. Satpur industrial estate is the biggest in the District. Besides these large scale industries, many small scale industries like leather goods oil ghanis, bidi making, handloom cotton, luggage bags, soap factories, confectionery and plastic goods making factories are located in the District.

**Trade and Commerce**

This District is well known for grapes and onion. The chief articles of export are grapes, onion, bidi, yevla silk sarees, sweet oil, sugar, poultry products and leather goods. Most of the commodities are sent to Mumbai and Pune markets and other places in the State. Grapes and onion are exported to other parts of the country also. In addition, timber and forest products are also exported to other places. Vegetables are mostly grown in Nashik, Niphad and Dindori Tahsils and sent to Mumbai, Surat and Balsad Markets.

The chief manufactured articles are ground nut oil, electrical goods, plastic pipes, rice products, steel, power loom cloth, spare parts, automobile, aeroplanes, Paithani sarees, aluminium cable, liquid blue, luggage bags, chemical powder etc.

The chief import articles are cloth, cotton yarn, petroleum products, raw materials for plastic product, electric goods, hard coal and tobacco etc. Most of these commodities are imported from Mumbai and Pune markets. Nashik, Malegaon, Nandgaon, Lasalgaon and Satana are important trade centres for agricultural products.

### Electricity and Power

All the 25 towns and 1,916 (99.84 percent) villages out of 1,919 inhabited villages have reported installed power supply facility.

### Gram Panchayat, its composition, jurisdiction and the role in the Development of village and its economy.

Gram Panchayat is the lower most rung of the democratic set-up of India. It is governed by the ‘Bombay Village Panchayat Act, 1958’. The ‘Sarpanch’ and in the absence of Sarpanch, the ‘Upa-Sarpanch’ preside over every meeting of ‘Gram Sabha’. At least four meetings of the ‘Gram Sabha’ are held every year. Sarpanch and UpaSarpanch are elected from amongst the elected members of the Panchayat.
73rd Constitutional Amendment

To make Panchayat Raj Institutions strong and to give more power to the people, the State Panchayat Act has been amended in confirmation with the 73rd Constitutional amendment, which is implemented in the State in April 1994. The Main fundamental provisions of the 73rd Constitutional amendments are as follows:

1. Constitution of Panchayat Raj Institutions at village, Intermediate (Development Block) and District level.
2. The seats and the offices of the Chairpersons in the Panchayats at all the levels to be reserved in favour of Scheduled Castes and Scheduled Tribes in proportion to the percentage of population of the Scheduled Caste or Scheduled Tribe, as the case may be.

Constitution of Gram Panchayat

The Gram Panchayat consists of not less than seven and not more than seventeen members elected from Wards on the basis of adult franchise. They hold office for a term of five years. Among these, a few seats are reserved for persons belonging to the Scheduled Castes, the Scheduled Tribes, Backward Class of citizens and Women, as may be determined by the State Election Commission in the prescribed manner.

Financial Assistance to Panchayats

Gram Panchayat-role in the Development of the village

Since the Gram Panchayat controls the village fund, it has an immense role in the development of the villages. It makes reasonable provision within the village and submits to the Panchayat Samiti for approval. It supervises the village water supply scheme. It makes provision for carrying out within the village any work which promotes health, safety, education, comfort, convenience or social or economic or cultural well-being of the inhabitants of the village.

Last but not the least, it is duty bound to take measures for the amelioration of the condition of Scheduled Castes and Scheduled Tribes and Other Backward Classes and in particular, in the removal of un-touch ability carry out the directions issued in this regard from time to time by the State Government.

Objectives of the Local Self Government

With a view to promote development of democratic institutions and to secure greater measure of participation by the people in Development Plans and in local and governmental affairs by decentralization of powers and functions, Zilla Parishad and Panchayat Samitis (C.D.Blocks) have
been established in the District of Maharashtra in the year 1962 under the Maharashtra Zilla Parishad and Panchayat Samiti Act of 1961. The jurisdiction of Zilla Parishad and Panchayat Samiti i.e. C.D.Blocks corresponds to the District and Tahsil boundaries except that the statutory towns are not covered by them.

The local self-bodies are working as agencies of State Government. The 73rd Constitutional Amendment gave local self-bodies the constitutional status. The new power bestowed upon them gave a great impetus to the development plans and its implementation.

**Zilla Parishad**

The Zilla Parishad has the authority for the purposes of the Act over the area for which it is established. The authorities charged with carrying out the provision of this Act for each District are—

- The Zilla Parishad,
- Panchayat Samiti,
- The Standing Committee,
- The Subjects Committees,
- Presiding authorities,
- The Chief Executive Officer and
- The Block Development Officer.

The Zilla Parishad is assisted in its function by number of departments and each department is headed by class I or class II officers of the State Services.

Zilla Parishad consists of Councillors directly elected on the basis of adult franchise from electoral divisions in the District for a term of five years. The number of councillors being not more than seventy-five and not less than fifty, some seats of councillors are reserved for the persons belonging to Scheduled Castes, Scheduled Tribes, Women and Backward Class citizens.

**Grants to Zilla Parishad**

1. Grant of 7 percent of forest revenue to Zilla Parishad.
2. Purposive grant – State Government pays every year to Zilla Parishad a grant for works and development schemes transferred to Zilla Parishad.
3. Establishment grant – State Government pays by way of establishment grant, the average cost on account of the salaries and allowances.
4. Local cess matching grant – State Government pays a local cess matching grant to be paid to Panchayat Samiti through the Zilla Parishad.
5. Incentive grant – State Government pays to Zilla Parishad an incentive to speedier development.
6. Grants for plan schemes – State Government pays grant for such works and development schemes relating to any subject enumerated in the District List as are included in the development plan of the State.
7. Block grant – State Government pays to each Panchayat Samiti through Zilla Parishad for carrying one such work and development scheme.
The development work of the District is carried out through the various committees appointed for the purpose by the Zilla Parishad. The executive power for the purpose of carrying out the provisions of the Act lies with the Chief Executive Officer, who is appointed by the State Government.

All the development work within the District is carried out by the Zilla Parishad through the District Fund at its disposal.

The Deputy Chief Executive Officer works as the ex-officio secretary of the Zilla Parishad.

**Panchayat Samiti**

Panchayat Samiti consists of members elected by direct election, its jurisdiction being the C.D.Block. The term of the members is five years. The Block Development Officer is the ex-Officio Secretary of the Panchayat Samiti. The Chairman and Deputy Chairman are elected by and from amongst the members of the Panchayat Samiti.

The overall plan of work and development schemes within the block is prepared and executed by the Panchayat Samiti.

**Devolution of Powers and functions**

As per the 73rd Constitutional Amendment, Articles 243-G and Schedule 11 of the Constitution, 29 subjects are to be transferred to the Panchayat Raj institution. The State Government implemented this amendment in April 1994 and provisions were made in the State Panchayat Raj Act to transfer these subjects to the Zilla Parishads, Panchayat Samitis and the Village Panchayats².

**Urban local bodies**

The statutory urban local bodies are Cantonments, Municipalities or Municipal Corporations. The urban local bodies elect a Councillor from each of the Wards. The President of the Municipal Council or the Mayor of the Corporation and also his Deputy are elected from amongst the elected Councillors. The Chairmen of the various committees are also elected from amongst the elected Councillors. Although for day-to-day administration, the Chief Officer is responsible for a Municipal Council, he works under the administrative control of the President of Municipal Council.

**Census Concepts**

**Building:**

A ‘Building’ is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc., but in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

---

Pucca houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, stones (duly packed with lime or cement mortar), G.I./Metal/Asbestos sheets, Burnt bricks, Cement Bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stones, Slate, G.I./Metal/Asbestos sheets, Concrete. Such houses are treated as pucca house.

Kutcha houses

Houses, in which both walls and roof are made of materials which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, unburnt bricks, bamboos, mud, reeds, thatch, plastic/polythene, loosed packed stone, etc., such houses are treated as Kutcha house.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant’s room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and veranda which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office etc. and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/he also lives in it as a separate household then this has been considered as a dwelling room available to the servant’s household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census house

A ‘census house’ is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common stair case or a common courtyard leading to a main gate, these are considered as a separate census house.

Village

The basic unit for rural areas is the revenue village which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Rural-Urban area

The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is ‘town’ for urban areas and ‘village’ for rural areas. The urban area
comprises two types of towns viz: Statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows:

(a) Statutory Towns: All places with a municipality, corporation, cantonment board or notified town area committee, etc. are known as Statutory Towns.

(b) Census Towns: All other places satisfying the following three criteria simultaneously are treated as Census Town

i) A minimum population of 5,000:

ii) at least 75 per cent of male working population engaged in non-agricultural pursuits; and

iii) a density of population of at least 400 per sq. km. (1,000 per sq.mile)

For identification of places which would qualify to be classified as ‘urban’ all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against (b)(ii), the data relating to main workers were taken into account. In addition to the above stated towns, urban areas also constitute of O.Gs which are the parts of U.As.

City

Town with population of 100,000 and above are called cities.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, military camps etc., may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an outgrowth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an ‘Urban Agglomeration’. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted:

(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and

(b) The total population of an Urban Agglomeration (i.e., all the constituents put together) should not be less than 20,000 as per the 2001 Census. It varying local conditions, there were similar other combinations which have been treated as Urban Agglomerations satisfying the basic condition of contiguity.

Out Growth (OG)

The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc., and physically contiguous with the core town of the UA.
**Household**

A ‘household’ is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

**Institutional household**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggar homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

**Houseless household**

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hune pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**Scheduled Castes and Scheduled Tribes**

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities, which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and/or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Castes in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

**Language and Mother tongue**

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person’s mother to the person. If the mother died in infancy, the language mainly spoken in the person’s home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

**Literate**

A person age 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

**Literacy rate**

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

**Educational level**

The highest level of education a person has completed.

**Work**

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in ‘work’ as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

**Main worker**

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as ‘Main worker’.
Marginal worker

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as ‘Marginal worker’.

Non worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as ‘Non worker’.

Cultivator

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fibre crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like tea, coffee, rubber, coconut and betel-nuts (areca). The worker engaged in plantation crops are recorded under “Other Workers”.

Agricultural labourer

A person who works on another person’s land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person’s land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household industry worker

Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods.

It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker

A person who has been engaged in some economic activity during the last year of reference period but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are ‘Other Workers’.

Work participation rate

Percentage of workers (main + marginal) to total population.
**Population density**

Population density is the number of persons inhabited per square kilometre of the area.

**Age**

Age is measured in terms of the completed number of years.

**Sex-ratio**

Number of females per 1000 males in a population.

**Non Census Concepts**

**Civic status of urban units**

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

**Size class of UA / town**

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 1,00,000 and above population are classified as Class I UAs / towns. Towns with, 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**Slum area**

The Slum Areas (Improvement and Clearance) Act, 1956 which was enacted by the Central Govt. defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**Mega city**

The concept of ‘Mega city’ is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut-off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 million and above population have been treated as Mega cities and the same criteria of population have been adopted in 2011 census.

**Concepts used in VD and TD of DCHB**

1. **Educational Amenities** : The type of different educational facilities available in the village is given in numbers. Both government and private educational facilities/institutions are considered for this purpose. If there are composites school like middle school with Primary classes or Secondary schools with Middle classes, these are included in the number of Primary and Middle school respectively. For example, if in a village, there are two Primary schools and one Middle school with Primary classes, the number of Primary schools in the village is given as three and that of Middles schools as one even
though there may be only three educational institutions. Similarly, this applies so also in case of Secondary Schools. For better understandings, the distinctiveness of different types of schools is depicted hereunder.

1.1. Pre-primary (PP) : Now-a-days, the children are sent to schools at a very early stage. Lot of Pre-primary schools, private schools in particular have come up in villages and towns. These may or may not be recognised by the competent authorities. Even many Secondary schools have classes starting from Pre-primary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school etc.

1.2. Primary School (P) : Schools providing education from standard I and upward up to and inclusive of Standard IV are classified as Primary schools.

1.3. Middle School (M) : Schools providing education from standard V and upward up to and inclusive of standard VII are classified as Middle schools. A school with class I to VII is treated as two units, i.e. one Primary school and one Middle school.

1.4. Secondary School (S) : Schools providing education from standard VIII and upward up to and inclusive of Standard X are classified as Secondary schools. A composite school with I to X standard is treated as three separate units and counted separately under the categories of Primary school, Middle school and Secondary school.

1.5. Senior Secondary School (SS) : Schools and colleges that provide education for standard XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior secondary schools with standard I and upward to standard XII.

1.6. Degree college

(i) Arts/Science/Commerce : These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) Engineering College (E) : It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B.Tech.) or post-graduate engineering degrees like M.Tech.

(iii) Medical Colleges : These are graduate/post graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D. or equivalent in the above branches of medicine.

1.7. Management College/Institute (MI) : It offers courses like Diploma in Management, Post-Graduate Diploma in Management Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt) : An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI : It is a Vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Training offered by Industrial Training Institute (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC) : Non-vocational education centres, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification and age. These education Centres are opened to all.
1.11. Special School for Disabled: There are Government and Government recognised institutions/organisations engaged for providing education to different groups of disabled persons.

2. Medical Facilities

2.1. Hospital-Allopathic and Hospital-Alternative medicine: A hospital is an Institution, were sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31-500 depending upon whether these are Sub-District, sub-divisional or District hospitals. If there are hospitals providing facilities under different systems of medicine such as, Allopathy, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathy: The system of medical practice, which treats disease by the use of remedies which produce effects different from those produced by the disease under treatment.

(b) Ayurveda: Ayurveda means “Science of Life”. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements is represented in the form of Tridosha: Vat, Pitta and Cough. These ‘Tridoshas’ are physiological entities of living beings. Ayurveda developed in eight distinct specialities i.e., Internal Medicines, Paediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of Virility. Two types of treatments, Preventive and Curative are given in Ayurveda.

(c) Unani: Treatment of Unani consists of three components, viz., preventive, promotive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis, Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani system emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movements and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homeopathy: Treatment in Homeopathy, which is holistic in nature, focuses on an individual’s response to a specific environment. Homeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animals sources. Homeopathic medicines do not have any toxic, poisonous or side effects. Homeopathic treatment is economical as well and has a very broad public acceptance.

2.2. Community Health Centre (CHC): Community Health Centres are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30 – bedded hospital providing specialist care in Medicine, Obstetrics and Gynaecology, Surgery and Paediatrics.

2.3. Primary Health Centre (PHC): A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor-observation beds. It acts as a referral unit for 6 sub-centres. It has a medical officer and para medical staff.

2.4. Primary Health Sub-centres (PHS): A Primary Health Sub-centres is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 population in hilly/tribal/desert areas. Each PHS has a sanctioned strength of one male and one female health worker.
2.5. Maternity and Child Welfare Centre (MCW): It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counselling, delivery, immunization of children with check-up etc.

2.6. TB Clinic (TBC): The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act a referral centres. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the District and it also functions as a specialized referral centre. The functions of Sub-District level Tuberculosis Unit (TU) are implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7. Health Centre: Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private of public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8. Dispensary: Place where patients are treated and medicines provided but with no in-patient facility, immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9. Veterinary Hospital: Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animal like cows, buffaloes etc. in rural areas.

2.10. Mobile Health Clinic: These are Mobile Vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated day to deliver the health care services. The services generally offered are OPD, Anti-natal, Post-natal, B.P. examination, X-ray, ECG, immunization and First aid etc.

2.11. Family Welfare Centre: Check-up and counselling is provided to the pregnant and the married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12. Nursing Home: A Nursing Home is a long term care facility licensed by the State that offers 24 hours room and board and health care services including basic and skilled nursing care, rehabilitation and full range of other therapies, treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13. Medicine Shop: A shop with sales drugs and medicines of any system of medicine viz., allopathic, homeopathic, Ayurveda or Unani medicines is considered as a medicine shop. Sometimes some shops and pan shops also keep ordinary medicines like Crocin, Burnol etc. These shops are not taken as medicine shop.

3. Drinking Water: The following are the main source of drinking water facility (ies) available in the village.

3.1. Tap Water-treated: This source of drinking water refers to a source of drinking water which is provided to the villages through pipes within their premises or to the villages through common taps (Public taps/community water points) by the Government departments, local bodies, Panchayats, public or private estate agencies etc. after treatment. Such a source is treated as ‘Tap water from treated source’.
3.2. **Tap Water-un-treated**: If the villages are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as ‘Tap water from untreated source’.

3.3. **Covered Well (CW)**: A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snow melt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animal cannot fall down the hole. It is considered as covered well.

3.4. **Un-covered Well (UW)**: A well which is (1) un-covered on sides from run-off water, (2) Un-covered bird droppings and animals or (3) both.

3.5. **Hand pump (HP)**: Hand pump means where ground water is taken out manually by operating a hand pump.

3.6. **Tube Well/Borehole (TW)**: Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lake are self-explanatory.

4. **Community Toilet Complex**: Community toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Shauchalaya or likes.

5. **Rural Sanitary Mart or Sanitary Hardware Outlet (RSM)**: It is an outlet dealing with the materials hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygienic accessories required for individuals, households and the environment in the rural areas.

2011 Census Findings

Brief Note on Census

Census taking is a massive operation carried out in a short span of time with the active participation of a veritable army of enumerators. The reference moment for the Census 2011 was the 00.00 hrs, of 1st March 2011. The census provides a snapshot of the population of the country as on 1st March 2011. Actual enumeration was spread over a period of 20 days from 9th February 2011 to 28th February 2011, followed by a revisional round up to 5th March 2011 for updating of the population figures with reference to 00.00 hours of 1st March, 2011. A household schedule having 29 questions for information on every individual in the household was used in 2011 Census. These questions are mainly self-explanatory and answers are recorded in text or in codes depending on the type of information collected. Question No. 1 to 14 are related to general and socio-cultural characteristics of an individual. Question 15 to 22 are about economic activity of the person whereas Question 23 to 26 are about migration. Some information related to fertility is collected from women through Question no. 27 to 29.

As a prelude to the actual Census, the urban and rural areas were identified and listed out in respect of each administrative unit. The Directorate of Census Operations has prepared the list of urban area (which is generally referred to as town list) and simultaneously a list of villages. These lists in fact form the basic frame for the organization of the Census Operations. Thereafter, geographical area that could be covered conveniently carved out to constitute the enumerator’s block.

The next major step was the house listing operation that was carried in the State during May-June 2010. Thereafter, in order to adhere to the prescribed workload norms, the actual Census enumeration blocks were formed on the basis of the layout sketches and the notional maps prepared was also utilised to collect wealth of information on items such as predominant construction material used for houses, amenities available to the Census households, number of living rooms etc. Information regarding Computer/Laptop, Mobile phone etc., was asked first time in this Census. From this information we can have an idea of standard of living of the people in the country.

In Maharashtra, Tahsil and the C.D.Block are co-terminus and therefore the data shown in tables on C.D.Blocks and the rural areas shown in the tables on Tahsils are same. And also, Sub-District in Maharashtra is known as Tahsil.

**Work Participation Rate**

Nature of one’s activity and extent of participation in economically productive works are the decisive factor for such a classification. Level of economic development of different regions within the District, availability of opportunities besides willingness to work especially among women, initiative and entrepreneurship evinced by men folk in general activities are the important factors that influence the distribution of population under these three categories i.e., main workers, marginal workers and non-workers.

The work participation for total workers is defined as the percentage of total workers to total population. In a similar way it is defined for main and marginal workers. There has been no conceptual change in defining the workers between 2001 and 2011 census. In 2011 Census, there has been mainly three-fold classification of population namely main workers, marginal workers and non-workers, which was adopted for 2001 also. An addition of one sub-category in marginal workers for those worked up to 3 months only is the small change in presentation of data on marginal workers.

Table-30 presents number and percentage of main workers, marginal workers and non-workers by sex in the Sub-Districts of the District according to Census, 2011.

The distribution of workers by sex shows that 51.94 percent males and 29.94 percent females are main workers. Thus, it is evident that while the gap in male and female worker participation rate in case of male workers is significant, it is very narrow in case of marginal workers.

Similar analysis of non-workers shows that 65.52 percent of females and 44.69 percent of males are non-workers. Thus, considerable proportion of females is reported to be non-workers as compared to males.

Nashik District recorded the work participation rate of 45.25 percent. The work participation rate of males and females is 55.31 and 34.48 respectively. The percentage of non-workers in the District is recorded to be 54.75. Further distribution of total workers into main workers and marginal workers shows that 41.31 percent are main workers and 3.93 percent are marginal workers. Thus, majority of the workers have been engaged in economically productive activity for six months or more in the preceding one year of the Census.
Table-31 presents number and percentage of main workers, marginal workers and non-workers by sex in C.D.Blocks and in rural areas of the District according to Census, 2011.

The C.D.Block-wise analysis shows that while Yevla C.D.Block with 52.2 percent main workers recorded the highest proportion of main workers, it is lowest in Igatpuri with 40.34 percent of its population reported as main workers. In case of marginal workers the highest percentage of 11.23 is recorded in Peint C.D.Block and lowest 3.27 percent in Nandgaon. The highest proportion of non-workers is reported in Igatpuri C.D.Block where 52.54 percent of its population reported as non-workers and the lowest being reported as 43.82 percent in Surgana.

As the data presented in Table-32 correspond to Towns in the District, it showcases the scenario of work participation in urban areas of the District. Nashik District recorded the work participation rate of 34.73 in urban areas. The work participation rate of males and females in urban areas is 53.33 and 14.52 respectively. The percentage of non-workers in urban areas of the District is recorded to be 65.27.

Further, distribution of total workers in urban areas into main workers and marginal workers shows that 32.15 percent are main workers and 2.58 percent are marginal workers. The analysis of data in Towns shows that while Samangaon (CT) with 39.57 percent main workers recorded the highest proportion of main workers, it is lowest in Igatpuri (M Cl) with 25.05 percent of its population reported as main workers.

In case of marginal workers the highest percentage of 9.81 is recorded in Pimpalgaon Najik and lowest 0.79 percent in Maldhe (CT). The distribution of workers by sex shows that 50.25 percent males and 12.47 percent females are main workers. Further, 3.08 percent males and 2.04 percent females are marginal workers. Similar analysis of non-workers in urban areas shows that 85.48 percent of females and 46.67 percent of males are non-workers.

The importance of the main spheres of economic activity may be gauged from the pattern of distribution of workers according to the broad four-fold classification. In Census, the data on workers is further classified in four major classes based on nature of economic activity reported of an individual. These classes are Cultivators, Agricultural Labourers, Household Industry Workers and Other Workers. This classification is termed as four-fold classification.
Table-33 presents the data on economic activity by sex in Sub-Districts classified in four categories of economic activity.

**Brief analysis of the Village Directory and Town Directory data**

The highlights of the data based on information collected for Village and Town Directory are presented in Tables 36 to 45. These are mainly related to facilities of education, medical, drinking water, transport and communications, banking, etc. The detail data are compiled for CD Blocks and Towns and a brief analysis has been made for these data for villages and towns.

Table-36 presents data on various facilities available to the villages whereas the similar data for population served by such facilities or beneficiaries are presented in Table-37. A brief note on each such facility along with a Table on appropriate data at which distance such facility is available is made separately.

**Education**

Analysis of data presented in Table-36 to Table-40 in respect of educational facilities is done in following paragraphs. Table-36 presents very progressive picture on educational facilities in the District as cent percent inhabited villages of the District have educational facilities in their respective jurisdiction. Thus in all the villages in all the C.D.Blocks educational facilities are accessible within their respective jurisdiction. Similarly as is evident from Table-37 cent percent of population have access to educational facilities within their villages.

Though Table-36 and 37 reveals cent percent access to educational facilities, it does not necessarily mean that educational facilities at all levels are available in the jurisdiction of all the villages. Table-38 presents data on distribution of villages not having certain educational facility and the distance from place where these are available. As presented in Table-38, out of 1919 inhabited villages in the District, only 10 villages do not have primary school facilities within their respective jurisdiction. However, in case of 4 villages primary school facilities are available at a distance of less than 5 kms., and in remaining 6 villages, it is available at a distance of 5-10 kms. Similarly, out of 696 villages not having middle school facilities within their villages, students of 388 villages have to travel a distance of less than 5 kms., and that of 154 villages each have to travel a distance of 5 to 10 kms., and more than 10 kms., respectively to reach to middle school. As regards to degree college, out of 1899 villages not having degree college facility within their villages, students of 172 villages have to travel a distance of less than 5 kms., and that of 468 villages the distance to be covered is 5 to 10 kms., and in remaining 1259 villages the students have to travel more than 10 kms., for a degree college from their village.

According to Table-39, cent percent of villages have educational facilities in all the ranges of distance from the nearest statutory towns as well as in all ranges of population size (Table-40)
Medical

Analysis of data presented in Table-36 to Table-40 in respect of medical facilities is done in following paragraphs.

According to Table-36, out of 1919 inhabited villages of the District, in 68.79 percent of villages, medical facilities of any kind are available in their respective jurisdiction. The distribution of villages reveals that Niphad C.D.Block with 89.55 percent of its inhabited villages having access to medical facilities has reported the highest percentage whereas Peint with 33.1 percent has reported the lowest.

As presented in Table-37, proportion of population having access to medical facilities is 89.01 percent. Deola C.D.Block with 97.5 of its population having an access to medical facilities has reported highest whereas Peint with 56.72 percent has reported lowest. As presented in Table-38, in case of 1806 villages out of 1919 inhabited villages the facility of hospital is not available and in 1818 villages PHC is not available within the jurisdiction of respective village. Amongst these, the population 418 villages for hospital and 382 villages for PHC have to rely upon hospital/PHC facility available at a distance of less than 5 kms., and that of 792 villages for hospital and 771 villages for PHC the distance is between 5 to 10 kms., whereas in case of remaining 596 villages for hospital and 665 villages for PHC the nearest hospital/PHC facility is available at a distance of more than 10 kms.

As presented in Table-40, out of 167 villages having population 1-499, only 4 villages constituting merely 2.4 percent, have medical facilities. In case of villages in population range 500-1999, about 753 villages (63.33 percent) have access to medical facilities. Out of 563 villages having population 2000 and above cent percent villages have access to medical facilities.

Post office

Analysis of data presented in Table-36 to Table-40 in respect of facility of post office is done in following paragraphs.

According to Table-36, out of 1919 inhabited villages of the District, in 974 villages constituting 50.76 percent, facility of post office is available in their respective jurisdiction. The distribution of villages reveals that Niphad C.D.Block with 90.3 percent of its inhabited villages having access to facility of post office has reported the highest percentage whereas Surgana with 21.05 percent has reported the lowest. As presented in Table-37, proportion of population having access to facility of post office is 72.37 percent. Niphad C.D.Block with 95.67 of its population having an access to facility of post office has reported highest whereas Surgana with 3 percent has reported lowest.

As presented in Table-38, in case of 945 villages out of 1919 inhabited villages, facility of post office is not available within the jurisdiction of respective village. Amongst these, the population of 271 villages have to rely upon post office available at a distance of less than 5 kms., and that of 235 villages the distance is between 5 to 10 kms., whereas in case of remaining 439 villages the nearest post office facility is available at a distance of more than 10 kms.

Table-39 presents the distribution of villages having the facility of post office and the distance of nearest statutory towns. It may be seen that, 33 villages are situated at a distance of less than 5 kms., from the nearest statutory town. Further, 61.94 percent of villages and 58.08 percent villages located at a distance between 5 to 15 kms., and 16 to 50 kms., respectively from the nearest statutory town. In
case of 26.78 percent of villages, the post office is available in the villages located at a distance of more than 50 kms from the nearest town.

As presented in Table-40, out of 167 villages having population below 500, none of the village has post office in respective jurisdiction. In case of villages in population range of 500-4999 about 53.41 percent of villages have post office facility. All villages in population range above 5000 have access to facility of post office.

**Telephone**

Analysis of data presented in Table-36 to Table-40 in respect of facility of telephone is done in following paragraphs. According to Table-36, out of 1919 inhabited villages of the District, 1839 villages constituting 95.83 percent have facility of telephone installed in their respective jurisdiction. This scenario is quite impressive. In all the C.D.Blocks, except Peint, more than 90 percent of the villages have installed facility of telephone. The distribution of villages reveals that in Igatpuri and Niphad C.D.Blocks cent percent of villages have telephone facility installed while Peint with 75.86 percent reported the lowest.

As presented in Table-37, an impressive proportion of population i.e., 99.17 percent is reported having access to facility of telephone. In case of all the C.D.Blocks except Peint, the proportion of population having access to facility of telephone is reported to be higher than 95 percent.

As presented in Table-38, out of 1919 inhabited villages in the District, only 80 villages do not have telephone facilities within their respective jurisdiction. However, all these villages can have the same at a distance within 5 kms.

As presented in Table-40, out of 167 villages having population less than 500, only 87 villages have telephone facility. Otherwise all villages with population 500 or more have the telephone facility.

Transport and Communications

Transport and communications includes bus service, rail facility and navigable waterways. If a bus stop, or a railway station or navigable waterway is located within the territorial jurisdiction of a village, it is considered to have been served by such a facility even if it is little away from the actual settlement. Analysis of data presented in Table-36 to Table-40 in respect of facility of transport and communication is done in following paragraphs.

According to Table-36, out of 1919 villages, in 1795 villages constituting 93.54 percent, some kind of facility of transport and communications is available in their respective jurisdiction. The distribution of villages reveals that except Peint and Surgana C.D.Blocks in all the C.D. Blocks, the percentage share of inhabited villages having access to some kind of facility of transport and communications is above 90 percent. As presented in Table-37, proportion of population having access to some kind of facility of transport and communications is 98.81 percent. Except in Peint C.D.Block with 87.86 percent of its population having an access to some kind of facility of transport and communications in all other C.D.Blocks, the percentage is above 90 percent.

Analysis of data presented in Table-36 to Table-37 and Table-39 to Table-40 in respect of approach by pucca road is done in following paragraphs.

According to Table-36, out of 1919 inhabited villages of the District, 1839 villages constituting 95.83 percent have approach by pucca road. The distribution of villages reveals that except Peint C.D.Block with 87.59 percent of its inhabited villages with approach by pucca road, in all the remaining C.D.Blocks, the percentage of inhabited villages having approach by pucca road is above 90. Similarly as presented in Table-37 also, proportion of population residing in villages having approach by pucca road is 95.28 percent. Except Peint C.D.Block with 88.27 percent of its population residing in villages having approach by pucca road, in all remaining C.D.Blocks the percentage of population residing in villages having approach by pucca road is more than 90.

Table-39 presents the distribution of villages having approach by pucca road and the distance of nearest statutory towns. It may be seen that, in case of 67 villages out of 68 inhabited villages constituting 98.53 percent, the approach to the village is pucca road and these are situated at a distance of less than 5 kms from the nearest statutory town. Further, out of 402 villages in case of 383 villages, constituting 95.27 percent and that of 937 villages out of 971 villages constituting 96.5 percent, the approach road to the village is pucca and these villages are located at a distance between 5 to 15 kms and 16 to 50 kms respectively from nearest statutory town. Out of remaining 478 villages,

As presented in Table-40, out of 167 villages having population below 500, in 150 villages constituting 89.82 percent have the pucca approach road to the village. Out of 1670 villages having population 500-4999, the approach road to village is pucca in case of 1607 villages constituting 96.23 percent total number of villages. Further, out of 82 villages having population above 5000, all villages have pucca approach road.

**Power Supply**

Analysis of data presented in Table-36 to Table-37 and Table-40 in respect of installed power supply is done in following paragraphs.

According to Table-36, out of 1919 inhabited villages of the District, 1916 villages constituting 99.84 percent have installed power supply. The distribution of villages presents impressive scenario as cent percent of inhabited villages of all the C.D.Block except Baglan (98.22 percent) have reported installed power supply. As presented in Table-37, proportion of population residing in villages having installed power supply is 100 percent except for Baglan C.D.Block where it is 99.97 percent. As presented in Table-40, out of 167 villages having population below 500, some 98.2 percent of villages have installed power supply. In case of other villages all they have installed power supply.

**Land use pattern**

Table-41 shows the land use pattern in the District, mainly how the available land has been put to uses under cultivation.

The cultivable area in the District is reported to be 59.25 percent of it’s total area. Out of 15 C.D.Blocks, the cultivable area is below the District average in 7 C.D.Blocks. Barely 28.50 percent area is irrigated to total cultivable area of the District. Niphad C.D.Block (64.47 percent) has the highest cultivable area under irrigation.
