

General Notes

For Census 2011, the population of "Others" has been clubbed with the "Males" for working out population, 0-6 population, literates and related rates and ratios.

Note of caution:

It will be important for the data users to bear in mind that the first flush of Census results, 'The Provisional Population Totals', is rather raw data and not subjected to the intensive checks and cross checks as in the case usual Census data. Further, the numbers given are somewhat tentative and final figures are bound to be different. Therefore, some caution is necessary while interpreting the results. The intelligent data user will have these limitations at the back of his mind but, still use the data to pick up some early demographic trends.

The figures in this report being of a provisional nature, only the important footnotes have been given above. The detailed footnotes would be given when the final population tables are released.
