MOTIF

SERCHHIP

Serchhip is the headquarters town of Serchhip district in the Indian state of Mizoram, and also the location of the Deputy Commissioner's Office. It lies in the central part of Mizoram, and it is 112 km away from the State capital city of Aizawl. It has an average elevation of 888 metres (2913 feet). It lies between the two very important rivers of Mat and Tuikum. River Tuikum is a public drinking water for Serchhip and River Mat is an irrigation water for Zawlpu, the rice bowl of Serchhip. As per 2011 Census, the population of Serchhip is 21157 of which 10770 are males and 10387 are females. The population of Serchhip consists of mainly ethnic Mizo.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Lalhmithanga, Deputy Director, Directorate of Census Operations, Mizoram. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

(C.Chandramouli)
Registrar General &
Census Commissioner, India

New Delhi.

Dated:- 16-06-2014

Preface

In the forward to this publication a summary of the background, coverage and content to the District Census Handbook have been provided. This volume contains the salient features and information on census and non-census data collected respectively during Census of India 2011 and from various states and Central Government Organizations so as to enable the data users to make full of fruitful utilisation of the data and various information presented herein. It is hoped that the micro level information incorporated in this publication will quench the thirst of planners and other users including research scholars for such details.

The publication of the District Census Handbooks for all eight districts of Mizoram is a joint ventures of the State Government of Mizoram and the Census Organization of Government of India. The design layout and various formats presented in the District Census Handbook have been provided by the Census Commissioner India. The compilation of various data, preparation of the analytical notes and gathering of all relevant information for incorporation in the DCHB have been attempted by this Directorate and the cost of publication is borne by the State Government. It may be mentioned here that the process of compilation of various data initially collected mainly from the Block Development Officer and respective Deputy Commissioners was finalized after cross checking with data obtained from concerned State and Central Government agencies so that as far as practicable, the discrepancies could be reconciled, we are grateful to all Block Development Officers, Deputy Commissioners, various Heads of Departments of the State and Central Government for their whole-hearted help and co-operation. I am grateful to the Secretary to the Government of Mizoram, General Administration Department (GAD), Additional Secretary, GAD, Under Secretary, GAD and all their helpers for sparing their valuable time during the preparation and publication of the District Census Handbook.

I convey my deep sense of gratitude to Shri C.Chandramouli, Registrar General and Census Commissioner, India for his valuable guidance and advice received from him right from the beginning. I am thankful to Miss Pratibha Kumari, Assistant Registrar General, Social Studies Division and Shri A.K. Arora, Joint Director, EDP Division of the Office of the Registrar General and Census Commissioner, India, who have been a source of constant help and guidance to us on all technical matters including planning and designing the formats. Because of their continuous help to us this volume could be produced in all India pattern. My thanks are also due to Shri A.P. Singh, Deputy Registrar General, (Map) for providing technical guidance in the preparation of maps as well as for printing of a large number of maps under his direct supervision and active guidance at the Headquarters office.

At the Directorate level, the preparation of this volume has been a product of a joint effort and team work of all my colleagues led by Shri D.R. Banerjee, Dy. Director and Mrs. R. Lalnghakhleli, Dy. Director. Because of their hard work and dedication of duties this volume could be published in time. I also convey my deep feeling of appreciation to all the officials of this Directorate who have put their efforts in the publication of the District Census Handbook.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and

cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses.

In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief history of the district

In Serchhip district there are a few places of historical importance which are included in the traditional folklores of Mizoram as well as tourist interests, some of them are:

i) **Vantawngkhawthla:** The Vantawng Falls is the most renowned waterfall in the Indian state of Mizoram. It is located in the south direction of the sub-division of Thenzawl, on the river named Lau. The altitude of the waterfall is 220 meters. The structure of the waterfall is very appealing; it is like a seven floored cliff. The name of the waterfall has been derived from the name of Vantawnga, who was an illustrious swimmer. His death occurred in the waterfall itself, when he was hit by a huge log carried down by the water of the waterfall. It is about 40 Kms away from Serchhip.

ii) **Lung Vando:** Around 5kms towards the North of E.Lungdar, there stands an erected stone called Lungvando. It is around a stone measuring 3.8ft in its spherical and 7.5ft high. Nothing is written on the stone and the person who erected the stone is also not known. Lungvando is mentioned in one of the tales of Mizo. It is said that once upon a time, the height of the Stone touched the sky and Phungpui (a female monster) used to lull her baby near the stone. But her baby was killed while she was away and so she shook the stone and broke it into pieces which fell into the northern and southern parts of Mualcheng.

iii) **ChhuraFarep:** Travelling from Serchhip, around 3 kms away from N. Vanlaphai is situated an erected stone in a hillock near the roadside which is called ChhuraFarep. It is 5 ft high and 2 ft wide. There are many curved drawings like human beings, bull, hornbill, shield and spear, gong and many others. On the upper side of the stone, there are drawings of children jointly which looks like meat to be smoked. The age of the stone is not known.

2. Major characteristics of the district, contribution of the district in the form of historical figure associated with the district.

Characteristics: Serchhip is one of the 5 new districts created in the year 1998 by carving out 4 (including Serchhip) out of the then Aizawl district and one (Lawngtlai) out of the then Chhimtuipui district. However the other four districts were elevated from the status of independently administered Civil Sub-Divisions (Sub-districts). Serchhip has the distinction of achieving the status of a district directly from the level of Rural Development Block (of Serchhip and a part of East Lungdar and Thingsulthliah RD Block). Located centrally in the State, and not far from the State capital even before the creation of the district, Serchhip is having a large number of moderately high level officers of most of the developmental departments of the State government. This coupled with the

generally higher level of association of the inhabitants of the district in the field of education, agriculture and related activities, Serchhip has the distinction of being the highest literate district in Mizoram with 97.91 % literate. Similarly in permanent cultivation of paddy, maize and other agricultural produce Serchhip occupies a very prominent place among all the other districts. Mizo is the principal language and it is the mother tongue of the vast majority of the population of the district. Staple food of the people of the district are rice, maize supported by a generous quantities of meat, fish and various types of vegetables are also popular as regular food. Christmas, New Year and other traditional festival are also celebrated throughout the district.

Contributions in the form of historical figure:

- i) **Thlanro:** It was built by Sialhau Chief Sangviala around 1931 in memory of her daughter. It is one of the most famous and magnificent grave in Mizoram. It was made of well-shaped stones with a curved rooftop. Around ten men can sit inside the grave. In this grave, the descendants of Sailo tribe used to put the dead bodies of their relatives. Their mortal remains were kept in separate chamber constructed for the purpose. The bones in this chamber can still be seen.
- ii) **LersiaKelkhumpuk:** On the central part of Kelkhumtlang, there is a cliff which cuts through the mountains. On that cliff, there is a cave which is 2ft wide and 11ft deep. The goats of Lersia used that cave for night lodging, and so the name is called LersiaKelkhumpuk.
- iii) **SanpohPuk:** The Mizo Chief Lalkhuma's(Hniarvungpa) traces could be seen in Vanlaiphai and its surrounding areas. The skeletons of their ancestor have been preserved by Saihnuna in this so called SanpohPuk which is still well-looked-after today.
- iv) **ChawngchilhiPuk:** The story of Chawngchilhi is one of the most famous stories in the history of Mizo. It is said that Chawngchilhi fell in love with a giant snake and she was impregnated by the snake. The cave was used by Chawngchilhi and the snake to spend time together. This cave is located between Thenzawl and Buangpui on the roadside. The hole of the snake can also be seen.

Administrative Set-up

Natural and administrative Developments and Significant Activities:

Wildfire: A wildfire is an uncontrolled fire in an area of combustible vegetation that occurs in the countryside or a wilderness area. Wildfires are a common occurrence in Mizoram because of the practice of Jhum cultivation known as slash-and-burn method of cultivation. On April 2014, there was wildfire in Serchhip for one whole week covering part of Thenzawl area and Serchhip town area. There was around ninety numbers of affected families; a huge area was destroyed bombarding the perennial crops mostly grown there. However, the Office of Deputy Commissioner assisted the affected families through funds received from SDRF (State Disaster Response Fund) thereby relieving the-cultivators and land owners from their huge loss.

Mega-Mock Drill: Miloram is a land of rolling hills, valleys, rivers and lakes. Most villages and towns are located on hill sides. Mizoram lies in the seismic Zone V, according to the India Meteorological Department, this means that the state has the highest risk of earthquakes relative to other parts of India. Serchhip District is one of the disaster prone districts of Mizoram. It experiences landslides, hailstorm, cyclones, cloudburst, forest-fire and road accidents. Though Serchhip has not yet faced major earthquake in the past, there awareness among the people to prepare themselves from the occurrence of earthquake. Fortunately, Serchhip District was selected as one of the districts in Mizoram to conduct Mega-Mock Drill on earthquake scenario of Shillong, 1897 of magnitude 8.5 Richter Scale on 13th March 2014 by NDMA. The exercise involves the cooperation and active participation of all the three southern districts of Mizoram namely, Lunglei, Lawngtlai and Saiha. Each District had sent their representatives from their respective Departments for the success of the event. The Deputy

Commissioner Office, Serchhip hosted the event inviting participants from Medical, Police, Fire, 14th Assam Rifles, PWD, P&E, NGOs, Volunteers, team of NDRF, SDRF etc. It was conducted in five different sites selecting market areas, hospital and offices. The event was very successful as it gave to the mind of the participants as to how to tackle huge disaster like earthquake in a reasonable and coherent manner with all channels of communication and teams already created for execution.

District Highlights 2011 Census

- By Urban Population Size, Serchhip District covers 49.31 and is occupying the 3rd place out of Eight District Of the State.
- Sex Ratio of the Districts 977 against the State Average ratio of 976.
- In terms of Literacy the District with a literacy rate of 97.9 is the Second highest in the State.
- Out of Total Notified Towns 23 ,there are 3 such notified Towns in the District.
- Chhingchhip Village with a population of 3,741 persons is the most populated village where Tuichang Village with a population of 27 is the least populated in the District.
- The Density of population of Serchhip District is 46 per sq. km against the State Average of 52 per Sq. Km .
- The Scheduled Tribes percentage of the District is 96.8 against the State Average of 94.4.

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 alongwith a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their States/UTs. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in

place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is an important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract - District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes - District/C.D. Block/Town.
4. Village Primary Census Abstract - C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
